

Addendum 2
Request for Proposals
Wireless Services – Everest Park and Houghton Beach Park
Job Number 48-14-IT

This addendum is issued to correct the following discrepancy found in the RFP document.

- 1.) On page 47 of the RFP, pathway indicated by street names for Everest Park, was incorrect and clarification was requested by the vendors that participated in the project walk through. Correct street labeling is included below.

Everest Park:

Provide material, personnel, equipment, to install a wireless mesh system along a designed pathway for coverage at Everest Park.

Provide and install approximately 3200ft of 12 strand fiber cable for RAP access from the splice point at Fire Station 22, on PSE poles along 108th Ave. NE/6th Ave. S. to 9th Ave S. and 8th St S. to utility pole midpoint of park and install RAP unit for wireless mesh coverage.

Installation of the aerial pathway from the splice case by FS 22, north on 108th Ave NE/ 6th Ave S, will be over lashed to existing City of Kirkland/LWSD innerduct and on new pole attachments east on 9th Ave S, north on 8th St S. on west side to park.

Provide pole survey information and obtain permits for new pole attachments along 9th Ave S, and 8th St S. from Puget Sound Energy (PSE).

Splice 2 strands of the new 12 strand fiber to the existing 72 strand fiber, at the splice case by FS22. Strand count to be provided.

Terminate the 2 strands of the 12 strand fiber with LC connectors at the wireless mesh end and connect to the mesh unit.

Addendum issued on November 20, 2014
